

AMAZING

THE SEAMLESS CONNECTIVITY

AIR FREIGHT

Our Air Freight – Reliable, Rapid and Ready when you are

We understand the critical nature of air freight — whether it's urgent, very urgent, or extremely urgent. At the core of our operations is a firm commitment to meeting customer expectations, regardless of how sensitive or time-critical the cargo may be.

From live animals requiring careful handling and continuous care, to fashion products that must hit retail timelines, or high-tech components and raw materials essential for uninterrupted production — we deliver with accuracy and care.

All of this is made possible through our **Seamless Connectivity Service Platform**, a robust and intelligent logistics network built to offer fast, dependable, and integrated air freight solutions worldwide.

SEA FREIGHT

Our Sea Freight – Global Reach with Cost-Effective Solutions

Sea freight remains the most efficient and economical option for international transportation — offering unmatched capacity at highly competitive rates.

At **AMAZING**, we combine in-depth industry expertise with strong global partnerships. These strengths allow us to skillfully negotiate and secure space allocations, ensuring your cargo moves smoothly, on schedule, and in line with your expectations.

Our ability to offer competitive freight rates is powered by an extensive logistics network and years of market insight. This is the foundation of our **Seamless Connectivity Model** — where smart, strategic connections drive reliable and cost-effective shipping solutions across the globe.

ROAD FREIGHT

Our Road Freight – Driving Connectivity Across Borders

Road freight remains a vital pillar in the global logistics landscape — one of the most familiar and foundational modes of transport. At **AMAZING**, we fully recognize its strategic importance and have developed a comprehensive **Cross-Border Trucking Model** that spans the Indo-China region.

As a pioneer in the use of 40-foot containers for cross-border road transport, we have significantly enhanced the efficiency of moving consumer goods such as energy drinks, canned and dehydrated foods, garment accessories, furniture, and household items across borders.

Taking innovation further, **AMAZING** has seamlessly integrated road and air transport under our proven **LAND–AIR Model**. This hybrid solution enables the smooth movement of garments and other commodities from Cambodia, Myanmar, and Laos to Bangkok International Airport via road, where they are then connected to international flights bound for global markets.

With strategic planning and innovative logistics, we ensure faster, more efficient cross-border transportation — every step of the way.

CUSTOMS BROKER

Our Customs Broker – Clearing the Way for Seamless Logistics

Customs brokerage is the final, yet critical, component of our **Seamless Connectivity Service Model**. With strong in-house capabilities and a fully integrated approach across air, sea, and road freight, we deliver true end-to-end operational excellence.

Our team of **certified customs specialists** expertly manages a wide range of commodities — from fresh produce, fruits and vegetables, and live animals to fishery products, pharmaceuticals, chemicals, auto parts, electronics, home appliances, and computer equipment.

In addition, we specialize in handling complex transit cargo flows, including **AIR–AIR**, **LAND–AIR**, and **LAND–SEA** operations. These are meticulously coordinated by our experienced customs brokerage team to ensure smooth, compliant, and efficient cross-border movements.

At **AMAZING**, we don't just move goods — we navigate complexity with precision.

AMAZING LOGISTICS AND SUPPLY CHAIN CO., LTD.
